

International Coffee Day

Coffee is the second most traded commodity in earth

In the US, coffee is a \$1.8 billion dollar business

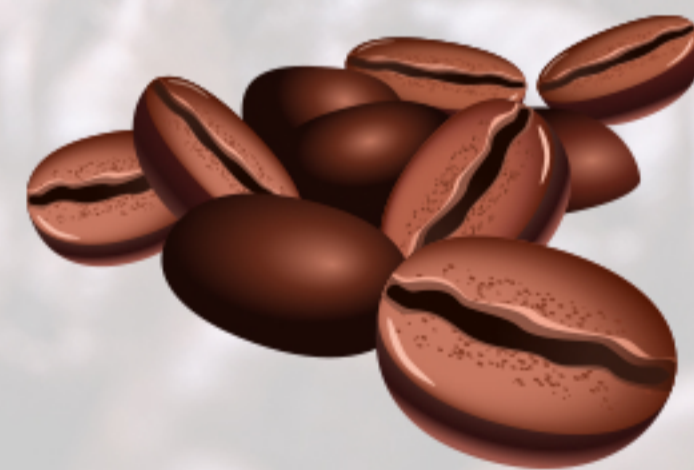

As of August 2020, the US is the 25th most consumer of coffee in the world

Americans consume approximately 2 to 3.5 cups of coffee per day

The chemical composition of coffee depends on variety, roasting temperature and brewing method

There are two main types of coffee: Arabica and Robusta

New Yorkers drink 7 times more coffee than the rest of the US
